## Reversible and Proportional Electric Actuators

The MP Series Actuators are used for two-position, floating, and proportional control of dampers, valves, and program switches in heating, ventilation, and air conditioning applications or similar applications.

Features:

- Proportional actuators with built-in feedback potentiometers.
- Spring return and non-spring return models available.
- $24 \mathrm{Vac}, 120 \mathrm{Vac}$, and 240 Vac models are available.
- Die cast housings with four $1 / 2$ in. conduit openings.
- Oil-immersed motor and gear train.

Typical Spring Return

Typical Non-Spring Return

[^0]MP-4xx Series

a Units with a "-2" suffix, e.g. MP-xxxx-xxx-2-x, include a built-in transformer (used for Microtherm or with AE-504) with secondary loads wired externally to terminals seven and eight of the actuator. Red ( 24 Vac ) to terminal eight and Blue ( 12 Vac ) to terminal seven. When these actuators are used with controllers other than Microtherm or AE-504, disconnect the Red and Blue leads and tape off. Note: Models prior to "-2" suffix had transformer wired directly to potentiometer. To disconnect the transformer, remove the back plate of the actuator, disconnect, and tape the transformer leads.
b Rotation adjustable 45 to $320^{\circ}$. Caution: On actuators with proportional input signals changing the rotation will affect the control, since the internal feedback potentiometer's travel is fixed.
c 6 to 9 V proportional.

Part Numbers for Hazardous Locations Applications.

| Hazardous Locations $^{\mathbf{a}}$ | Hz | Listing |
| :--- | :---: | :---: |
| MP6-4xx | 60 | UL Listed and CSA Certified |
| MP7-3xx, MP7-4xx | 50 |  |

a Class 1, Groups C and D, and Class 2, Groups E, F, and G Hazardous Locations; Ref. EN-56-2.

| Specifications |  |
| :---: | :---: |
| Input Control signals | Refer to the Model Charts for input control signal capability versus specific actuator models. |
| Floating | Requires one Single Pole Double Throw (SPDT) switch with floating (center off) position rated at 0.9 amps at 24 Vac or two Single Pole Single Throw (SPST) switches rated at 0.9 amps at 24 Vac. |
| Two-position | SPDT: Requires snap acting switch rated at 0.9 amps at 24 Vac . |
|  | SPST: Can be used with certain spring return actuators. Switch must be rated to handle actuator power requirements. |
| Microtherm ${ }^{\circledR}$ | Proportional electrical system with the following typical controllers: PP-22x Series, TP-1xx Series, TP-2xx Series, TP-3xx Series, TP-4xx Series, TP-1xxx Series, and TP-1xxxx Series. |
|  | Standard: Control of a single actuator. |
|  | Sequencing: Control of two actuators in sequence. |
|  | Five-position: Used typically for adjustable minimum position (five positions) of an economizer actuator. |
| Slidewire and paralleling | Requires AE-504 paralleling relay. AE-504 accepts $100 \Omega$ to $1000 \Omega$ slidewires. |
| Voltage Vdc (System 8000) | Requires CP-8301-xxx or CP-9301-xxx Series of solid state actuator drives. Refer to the Model Charts. |
| Current mAdc | Requires CP-9302-xxx Series of solid state actuator drives. Refer to the Model Charts. |
| Connections |  |
| MP-3xx, 4xx, 2xxx, 4xxx | Coded screw terminals. |
| Models -600 Suffix | Coded screw terminals except for input signal which are color coded pigtails. |
| Power Requirements | Refer to the Model Charts to determine power requirements. |
| Torque | Refer to the Model Charts to determine the actuator torque rating. |
| Nominal damper area | Actuator sizing should be done in accordance with damper manufacturer's specifications. |
| Spring return | Refer to the Model Charts for models that are spring return. |
| Environment |  |
| Ambient temperature limits | Shipping and storage: -40 to $160^{\circ} \mathrm{F}\left(-40\right.$ to $\left.71^{\circ} \mathrm{C}\right)$. Operating: -40 to $136^{\circ} \mathrm{F}\left(-40\right.$ to $\left.58^{\circ} \mathrm{C}\right)$. |
| Humidity | 5 to $95 \% \mathrm{RH}$, non-condensing. |
| Locations | NEMA 1. |
|  | NEMA 4 for non-spring return actuators with AM-363. |
| Dimensions |  |
| MP-3xx, 4xx, 2xxx, 4xxx | $7 \mathrm{H} \times 5-3 / 8 \mathrm{~W} \times 6-5 / 16 \mathrm{D}$ in. ( $178 \times 136 \times 160 \mathrm{~mm}$ ) NSR. |
| Models -600 Suffix | $7 \mathrm{H} \times 5-3 / 8 \mathrm{~W} \times 8-1 / 8 \mathrm{D}$ in. ( $178 \times 136 \times 206 \mathrm{~mm}$ ) SR plus actuator drive housing. |
| Agency Listings |  |
| UL 873 | File E9429 Temperature Indicating and Regulating Equipment. |
| CUL | Canadian Standard \#LR 3728. |
| European Community | EMC Directive 89/336/EEC and 92/31 EEC. Low voltage Directive 72/23EEC. Units with a "-xxx-x-2" suffix identify models that are in compliance with CE. Example: MP-xxxx-xxx-x-2. |
| General Instructions | Refer to F-15479. |

## Description

Crank arm for $5 / 16 \mathrm{in}$. ( 7.9 mm ) diameter damper shaft.
Crank arm for $3 / 8 \mathrm{in}$. ( 9.5 mm ) diameter damper shaft.
Crank arm for $1 / 2 \mathrm{in}$. ( 12.7 mm ) diameter damper shaft.
Crank arm for 7/16 in. ( 11.1 mm ) diameter damper shaft.
Splined crank arm for actuator.
Linkage connector, straight type.
Damper clip.
$5 / 16 \times 20$ in. ( $7.9 \mathrm{~mm} \times 0.5 \mathrm{~m}$ ) damper rod.
$5 / 16 \times 48 \mathrm{in}$. ( $7.9 \mathrm{~mm} \times 1.2 \mathrm{~m}$ ) damper rod.
Ball joint connector.
Damper linkage kit.
Damper linkage kit.
90 degree mounting bracket.
Two step switch kit.
Potentiometer kit.
Four step switch kit.
Two step switch and potentiometer kit.
NEMA 4 gasket kit for non-spring return actuators only.
Electronic drive, voltage input 1 to 20 Vdc .
Electronic drive, voltage input 6 to 9 Vdc .
Electronic drive, voltage input 4 to 20 mAdc .
Calibration kit for System 8000.
$135 \Omega$ slidewire calibration kit.
Valve linkage for 50 lb .-in. minimum, $180^{\circ}$ actuator.
AV-391 Valve linkage for $1 / 2$ to 2 in. VB-7XXX and $1 / 2$ to $1-1 / 4$ in. discontinued VB-9XXX.
AV-392 Valve linkage for $1-1 / 2$ and 2 in. discontinued VB-9XXX.
AV-395 Valve linkage for 2-1/2 to 4 in VB-9213 or VB-9313.
Valve linkage for 130 lb .-in. minimum, $180^{\circ}$ actuator.
AV-352 Valve linkage for 2-1/2 to 6 in VB-9213 or VB-9313, 4 to 6 in. VB-9323.
AV-393 Valve linkage for $1 / 2$ to 2 in . VB-7XXX and $1 / 2$ to $1-1 / 4 \mathrm{in}$. discontinued VB-9XXX.
AV-394 Valve linkage for $1-1 / 2$ and 2 in. discontinued VB-9XXX.
AV-396 Valve linkage for 2-1/2 to 4 in . VB-9213 or VB-9313.

## Typical Applications

Terminals 1,5, \& 6 are used for built-in auxiliary switch.Rotates CW or Lowers Valve Stem.
Rotates CCW or Raises Valve Stem.
These terminal are marked L1 \& L2 on line voltage actuators. Remove green wire to unground actuator. SPDT Neutral Off Switch may be used on manual positioning applications.
7 Switch control circuit is 0.5 amp at approx. 24 Vac on either low or line voltage actuators.Install under cover of actuator.

Figure 5 Typical Proportional Electronic - Voltage.
Wiring for MP-461-600, MP-471-600, MP-481-600.

# MP-3xx Series, MP-4xx Series, MP-2xxx Series, and MP-4xxx Series 

 removed for isolation purposes. 24 Vac models are equipped with a jumper from terminal $G$ to the case ground screw.
6 The green/yellow wire must be installed under the terminal block
mounting screw.
7 Shield must be grounded to the terminal block mounting screw.

Purge override (input signal override) is available on CP-9302 only. A dry contact closure from the override input (violet/white) lead to the blue lead of the actuator drive forces the actuator to drive to the end of travel, independent of the input signal conditions. Connecting the violet/white and violet leads together forces the actuator to drive to the opposite (high input signal) end of travel, independent of input signal conditions.
9 This wire should be removed on CP-9302 when driving multiple actuators.

Figure 6 Typical Proportional Electronic Current/Voltage Wiring for CP-930x to MP-3xx, MP-4xx, and MP-21xxx Series Actuators.

[^0]:    a Units with a "-2" suffix, e.g. MP-xxxx-xxx-2-x, include a built-in transformer (used for Microtherm or with AE-504) with secondary loads wired externally to terminals seven and eight of the actuator. Red ( 24 Vac ) to terminal eight and Blue ( 12 Vac ) to terminal seven. When these actuators are used with controllers other than Microtherm or AE-504, disconnect the Red and Blue leads and tape off. Note: Models prior to "-2" suffix had transformer wired directly to potentiometer. To disconnect the transformer, remove the back plate of the actuator, disconnect, and tape the transformer leads.
    ${ }^{\text {b }}$ Rotation adjustable 45 to $320^{\circ}$. Caution: On actuators with proportional input signals changing the rotation will affect the control, since the internal feedback potentiometer's travel is fixed.
    c Integral solid state drive CP-8301 accepts 6-9 Vdc voltage with 20 Vdc power supply included.
    ${ }^{\text {d }}$ Integral solid state drive CP-9301 accepts 6-9 Vdc voltage.
