Amplifiers

R7257, R7258, R7259 Flame Safeguard Amplifiers

Solid state, plug-in units allow use of rectification, infrared and ultraviolet flame detections. Use with Q518, Q519 and W688A Flame Safeguard multiburner modules and appropriate flame detector.

APPROVALS:

Underwriters Laboratories Inc. Listed: R7258—File No. 268, Vol. 15, Sec. 1.

Canadian Standards Association Listed: R7257— Report No. LR1620-231; R7258—Report No. LR1620-510, 443, 231, 230, 490; R7259—Report No. LR1620-443, 231, 230.

Available only through Honeywell Authorized Flame Safeguard Distributors.

Order Number	Type	Amplifier Color	Self-Checking	Flame Failure Response Time	Use With		
R7257A1028	Rectification	Green	No	3 sec	Gas	Rectifying Flame Rods	Holder ^a : C7004, C7007 Complete Assemblies: C7005, C7008, C7009, Q179.
					Oil	Rectifying Photocells	C7010, C7013, C7014
					Gas, oil, coal	Ultraviolet (Purple Peeper)	C7012A or C
R7258A1001	Infrared	Red	No	3 sec	Gas, oil, coal	Infrared (Lead sulfide)	C7015
R7259A1000	Ultraviolet	Violet	No	3 sec	Gas, oil, coal	Ultraviolet (minipeeper)	C7027, C7035

^a Order flame rod separately; see instruction sheet for holder.
