TAC DuraDrive ${ }^{\circledR}$ Series Actuators<br>and Accessories

## Selection Guide

## Applications

TAC DuraDrive Direct Coupled Actuators are designed to accept two-position, floating, or proportional control from a DDC system or from a thermostat, for control of HVAC applications. The actuators are designed to be used in both damper and valve control applications. Typical applications include air handling units, unit ventilators, fan coil units, VAV terminals, control dampers, inlet guide vanes, and linked valve assemblies.
Use the following guide to select actuators for damper applications. Refer to the Applicable Literature table for valve literature.

## Product Warranty

TAC DuraDrive actuators are covered by a five year warranty.

## Using this Selection Guide

This selection guide contains the following sections:

## Actuator Part Numbering System

This section explains the TAC DuraDrive actuator part numbering system.

## Actuator Selection Chart

Use this chart as a quick reference guide. Refer to Actuator Selection section for specifications data, as well as mounting dimensions.

## Actuator Accessories Chart

Use this section to choose the appropriate accessories for the selected actuator.

## Actuator Specifications and Mounting Dimensions

Use this section to choose the appropriate actuator for the application. This section includes actuator specifications data, as well as mounting dimensions.

## Damper Actuator Cross-Reference

Refer to this section for actuator replacement data.

## Actuator Specifications and Mounting Dimensions

## MF41-6043 and MS41-6043 Actuators

For non-spring return applications requiring floating or proportional modulation control of dampers and valves in HVAC systems.
Features:

- Direct mount to round, square, or hexagonal damper shaft
- Rated at $35 \mathrm{lb}-\mathrm{in}$. ( $4 \mathrm{~N}-\mathrm{m}$ ) torque, minimum
- Does not require any limit switches
- Manual override allows positioning for installation and manual operation
- MF41-6043 provides floating point control (3-position)
- MS41-6043 provides proportional control compatible with 0 to 10 Vdc
- Models available with: independently adjustable dual auxiliary switches; adjustable start point (offset) and span

- 5-year warranty

## MF41-6153 and MS41-6153 Actuators

For non-spring return applications requiring floating or proportional modulation control of dampers and valves in HVAC systems.

Features:

- Direct mount to round or square damper shaft
- $133 \mathrm{lb}-\mathrm{in}(15 \mathrm{~N}-\mathrm{m})$ torque rating
- Does not require any limit switches
- Manual override to allow positioning for installation and manual operation
- MF41-6153 provides floating point control (drive open-hold-drive closed)
- MS41-6153 provides proportional control compatible with 0 to 10 Vdc or 0 to 20 mAdc
- 5-year warranty

## MA40-704X, MF40-7043, and MS40-7043 Series Actuators

For spring return applications requiring floating, two-position, or proportional modulation control of dampers and valves in HVAC systems.

Features:

- Direct mount to round or square damper shaft
- $35 \mathrm{lb}-\mathrm{in}(4 \mathrm{~N}-\mathrm{m})$ torque rating
- Overload protection throughout rotation
- Optional built-in auxiliary switches
- True mechanical clockwise or counterclockwise spring return operation for reliable, positive close-off in airtight applications
- Visual position indicator

- Direct acting or reverse acting control mode available on proportional models
- Rotation limiting available
- Rugged die-cast housing for NEMA 2/IP54 rating
- 5-year warranty

## MA40-717X, MF40-7173, and MS40-717X Series Actuators

For spring return applications requiring floating, two-position, or proportional modulation control of dampers and valves in HVAC systems.

## Features:

- Direct mount to round or square damper shaft
- $150 \mathrm{lb}-\mathrm{in}(17 \mathrm{~N}-\mathrm{m})$ torque rating
- Overload protection throughout rotation
- Oil immersed gear train provides continuous lubrication
- NEMA 4 housing (IEC IP56)
- Automatic current sensing motor control provides extended reliability and repeatable timing
- Provides true mechanical clockwise or counterclockwise spring return operation for reliable positive close-off in airtight applications

- MA40-717X models provide on-off control
- MF40-7173 models provide floating point control (drive open-hold-drive closed)
- MS40-717X models provide proportional control compatible with 2 to 10 Vdc or 4 to 20 mAdc with the addition of a 500 ohm resistor (not included)
- 5-year warranty
- Can be double mounted (gang mounting) to accommodate high torque application requirements ( 2 to 4 actuators)
- MS40-717x models provide position feedback signal

## Actuator Specifications

## MF41-6343 and MS41-634X Series Actuators

For non-spring return applications requiring floating or proportional modulation control of dampers and valves in HVAC systems.

## Features:

- Direct mount to round or square damper shaft
- $300 \mathrm{lb}-\mathrm{in}(34 \mathrm{~N}-\mathrm{m})$ torque rating
- Overload protection throughout rotation
- Oil immersed gear train provides continuous lubrication
- NEMA 4 housing (IEC IP56)
- Manual override to allow positioning for installation and manual operation
- Automatic current sensing motor control provides extended reliability and repeatable timing
- MF41-6343 models provide floating point control (drive
 open-hold-drive closed)
- MS41-634X models provide proportional control compatible with 2 to 10 Vdc or 4 to 20 mAdc with the addition of a 500 ohm resistor (not included)
- 5-year warranty
- Can be double-mounted (gang mounted) to accomodate high torque application requirements ( 2 to 4 actuators)
- MS41-634x models provide position feedback signal

## Actuator Specifications

Control Signal
MF41-6343 - SPDT floating control output, Triacs ( 500 mA rated), or 2 SPST contacts.
MS41-634X - proportional, 2 to 10 Vdc or 4 to 20 mAdc with the addition of a 500 ohm resistor (not included).
Power Requirements
All 24 Vac and 22-30 Vdc circuits are Class 2. All circuits 30 Vac and above are Class 1.

| Part Numbers | Power Input @ 50/60 Hz |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Voltage | Running VA | Holding VA | Watts |
| MS41-6343 | $24 \mathrm{Vac} \pm 20 \%$ | 5.6 | 4.0 | 3.6 |
|  | $22-30 \mathrm{Vdc}$ | 3.4 | 2.2 | 3.4 |
| MS41-6340 | $120 \mathrm{Vac} \pm 10 \%$ | 7.5 | 6.2 | 4.7 |
| MS41-6341 | $240 \mathrm{Vac} \pm 10 \%$ | 9.0 | 8.1 | 5.0 |
| MF41-6343 | $24 \mathrm{Vac} \pm 20 \%$ | 5.7 | 4.1 | 3.9 |

## Connections

Class 1: 24 inch (61 cm) long appliance cables, $1 / 2 \mathrm{in}$. conduit connector. For M20 Metric conduit, use AM-756 adaptor.

Class 2 Power and 36 inch ( 91 cm ) long, 22 AWG color coded appliance cable pigtail leads. $1 / 2 \mathrm{in}$. conduit Control: connector. For M20 Metric conduit, use AM-756 adaptor.
Motor Type Brushless DC

| Electrical | Stroke: Electronically limited to $92^{\circ} \pm 1^{\circ}(\mathrm{MS})$. MF Mechanically limited To $101^{\circ} \pm 1^{\circ}$. |
| :---: | :---: |
|  | Timing: Approximate timing is 148 sec . (MS) and 162 sec . for MF models. |
| Mechanical | Output torque rating: $300 \mathrm{lb}-\mathrm{in}$. ( $34 \mathrm{~N}-\mathrm{m}$ ) minimum, $650 \mathrm{lb}-\mathrm{in} .(73.7 \mathrm{~N}-\mathrm{m}$ ) maximum. |
|  | Position indicator: Pointer and scale are provided for position indication). |
|  | Direction of rotation: CW or CCW rotation is available through reversible mounting. |
|  | Damper Shaft Clamp: Direct coupled using a through hole output hub. |
|  | Damper Shaft Size: $3 / 8$ " to $1 / 2^{\prime \prime}$ round and $3 / 8$ " to $1 / 2^{\prime \prime}$ square. With AM-754, up to 1.05 " in diameter and 5/8" square. |

Nominal Damper Area: Actuator sizing should be done in accordance with damper manufacturer's specifications.

| Environment | Manual Override: Activated by the manual override crank. |

## Damper Actuator Cross Reference

TAC assumes no responsibility for guaranteeing the acceptability of any suggested replacement in this section. The emphasis has been placed on providing a replacement actuator of the same specifications wherever possible. The user must determine the acceptability of the substitution by reviewing the actuator specifications.

The cross reference tables list TAC Direct-Coupled Actuators which may replace obsolete SEC and Belimo devices, as well as older TAC devices. The tables list two-position, floating, and proportional actuators. The devices to be replaced are listed alphanumerically in the left-hand column, with the suggested TAC replacement in the center column. The replacement actuators in this list represent what we believe are equivalent units.
