

TSC-2000 Series

Static Pressure Transmitters

Description

The KMC TSC-2000 series are one-pipe pneumatic devices designed to transmit a fully proportional, fixed span 3 to 15 psig (20 to 103 kPa) output signal.

With five different ranges available, the output signal can be used as an input for receiver controllers or receiver gauges for visual indication of system conditions.

The TSC-2000 series requires a restricted input air supply. An HFO-0010 restrictor T is available separately. The units must be mounted with the control air port pointing down.

Features

- ◆ Fully proportional 3 to 15 psi (21 to 103 kPa) signal
- ◆ Five selectable output signal ranges
- ◆ Works with receiver controllers or receiver gauges.

Applications

Typical uses include sensing and transmitting static pressure drop across filters, fans or any two reference points or velocity pressure differentials.
